SUNEEL SAJJA

AI & ML Engineer

suneel.sajja1209@gmail.com | 9550897271 | Hyderabad, Telangana, India | linkedin.com | github.com

PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with hands-on, production-oriented experience building Artificial Intelligence and Generative AI applications in Python, including Retrieval-Augmented Generation (RAG) pipelines, multi-agent systems, and multi-tenant AI chatbots. Skilled in full-stack development with React.js/React Native and FastAPI, machine learning model development, training, and evaluation, SQL/NoSQL data modeling, and writing clean, well-documented, object-oriented Python code for model training, evaluation, and deployment. Experienced in preprocessing, labeling, and analyzing datasets to improve model performance, managing database migrations with Alembic, and debugging, optimizing, and monitoring ML and API workflows using Git version control. Strong track record of cross-functional collaboration with data engineers and product teams, participating in code reviews, and researching emerging AI trends and techniques to bring back actionable insights to the team. Seeking a Fresher AI & ML Engineer / Backend Developer role to apply applied AI, machine learning, and full-stack engineering skills toward measurable business impact.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL (MySQL, Advanced Queries), JavaScript, TypeScript, Object-Oriented Programming
- **AI / Machine Learning & Generative AI:** Machine Learning, Artificial Intelligence, Generative AI (GenAI), Model Development, Training & Evaluation, RAG, LLMs, Prompt Engineering, Embeddings, Semantic Search, Hybrid Search, NLP, OCR
- **AI Frameworks & Tools:** FastAPI, LangChain, LangGraph, SentenceTransformers, SPLADE, spaCy, Gemini, Groq, Qdrant
- **Machine Learning & Data Science:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Statistical Analysis
- **Databases**: MongoDB Atlas, MySQL, PostgreSQL, Redis
- **Web Development:** React.js, React Native, Next.js, REST APIs, JavaScript, TypeScript
- **Authentication & Deployment:** JWT (Role-Based Authorization), Docker, Git, GitHub, Render
- **Development & API Tools:** VS Code, Jupyter Notebook, Google Colab, Postman

PROFESSIONAL EXPERIENCE

AI & ML Intern **May 2026 – Present**

***DataLabs Corporation**, Hyderabad*

- Design, develop, and test production-oriented Artificial Intelligence and Machine Learning applications end-to-end using Python, FastAPI, RAG pipelines, LLMs, embeddings, and vector databases, taking model features from prototype through evaluation to deployment.
- Build and integrate multi-tenant Generative AI chatbot systems with secure authentication, document ingestion, hybrid retrieval, and LLM-based response generation, enabling multiple organizations to query their own knowledge bases in isolation.
- Architect data and API layers using SQL and NoSQL databases (MongoDB, Qdrant), implement JWT-based authentication and access control, and write clean, well-documented, object-oriented Python code while collaborating on React/Next.js front-ends and cloud deployment workflows using Git/GitHub.
- Support debugging, optimization, and monitoring of Machine Learning workflows, and collaborate with cross-functional teams on data models, APIs, and front-end integration.

Data Analytics Intern **10/2025 – 03/2026**

Innomatics Research Labs Hyderabad

- Collected, cleaned, and automated large-scale datasets (50K–300K rows) using Python (Pandas, NumPy), improving data accuracy by 40% and reducing manual preprocessing time by 3 hours per week.
- Performed end-to-end exploratory data analysis (EDA) using Python and SQL to identify trends, patterns, and anomalies across 5+ business datasets, surfacing actionable insights for stakeholder presentations.
- Built 4+ interactive KPI dashboards in Power BI with DAX measures, enabling real-time performance tracking for key business metrics across sales and operations.

PROJECTS

Financial News Intelligence Platform | *Python, FastAPI, LangGraph, Next.js, React, TypeScript*

- Built a production-oriented Artificial Intelligence financial news intelligence platform integrating news from sources such as RBI, NSE, and BSE.
- Developed an AI-driven multi-agent Machine Learning pipeline for ingestion, semantic deduplication using SentenceTransformers + Qdrant, entity extraction with spaCy, and company/sector/regulatory impact analysis with confidence scoring.
- Implemented RAG-based query processing with query expansion, vector retrieval, LLM-generated answers, and persistent storage using PostgreSQL, Qdrant, and Redis.

Multi-Tenant Company Policy RAG Chatbot | *Python, FastAPI, React/Next.js, MongoDB, SQL, Qdrant, LLMs*

- Built a multi-tenant Generative AI RAG chatbot allowing organizations to upload and query their policy documents using embeddings and LLMs.
- Implemented JWT authentication, document ingestion, PDF/OCR processing, hybrid retrieval, tenant-level data isolation, and LLM-powered contextual responses.

Healthcare RAG Chatbot | *Python, FastAPI, LangChain, Qdrant, SentenceTransformers, SPLADE, Gemini*

- Developed a healthcare-focused Artificial Intelligence RAG chatbot with document retrieval and domain-restricted responses, implementing PDF extraction/OCR, text chunking, dense and sparse embeddings, similarity search, and threshold filtering.
- Used LangChain to orchestrate the retrieval-augmented generation pipeline, chaining document loaders, embedding models, and the LLM into a single query-to-answer flow.

EDUCATION

Master of Computer Applications (MCA) – 80% 10/2023 – 06/2025
Siddharth Institute of Engineering & Technology Puttur

Bachelor of Science (BSc) – 70% 07/2020 – 09/2023
S.G.S Arts College Tirupati

Data Analyst Program 07/2025 – 02/2026
Innomatics Research Labs Hyderabad

CERTIFICATES

- AI Associate – Salesforce
- Advanced Data Analysis – Nasscom
- Certification in Data Analysis – Innomatics Research Labs
- Power BI Micro Course – Skill Course (25 Dec 2025)
- Exploratory Data Analysis – Innomatics Research Labs

LANGUAGES

English | Telugu | Tamil
